

WITH OUR NEW LID APPLICATOR YOUR COMPETITIVE ADVANTAGES WILL BE SO GREAT, WE PROMISE TO KEEP A LID ON IT.

Introducing QComp's High Speed Lid Applicator for Pick and Glue.

QComp Technologies offers an extremely versatile, high speed delta robot cell that will maximize the throughput of your lid application. The cell features the flexible ABB IRB 360 Flex Picker robot with a blazing speed of up to 90 picks per minute. The Integrated GigE camera vision system along with our gluing application ensures precision placement of the lid. Find out today how QComp's complete turnkey solution will reduce your production costs and increase your flexibility.

SINGLE CELL LID APPLICATOR

Single Lid Applicator cell being staged for testing at QComp.

DIVERSE LID TYPE CAPABILITIES

Typical products handled with QComp's High Speed Lid Applicator.

DUAL CELL LID APPLICATOR

Dual Lid Applicator for higher speeds or multi-line integration.

LID APPLICATOR CELL FEATURES

- Advanced Pickmaster Interface
 - Single point HMI to change products
 - Single project variable height feature
 - Auto image adjust improves accuracy
- ABB IRB 360 Flex Picker robot
- Up to 90 picks per minute
- Integrated GigE camera vision system
- Pre-engineered solution for fast project ROI
- Precision glue and placement applications
- Hot Melt glue dispenser

OTHER APPLICATIONS

- Coupon placement
- Balanced feed of flow wrappers
- Tray filling and packing
- Collating and sorting of mixed product
- Layer building prior to case packer
- Pre- and post-inspection & grading
